### **DETAILED ACTION**

\*\*\* This office action is in response to Applicant's Amendment filed December 22, 2003.

Claims 7-10 and 25-33 are currently pending.

\*\*\* The drawing Fig 10 filed December 22, 2003 has been approved by Examiner for replacement.

#### **Examiner's Amendment**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE CLAIM: (Minor correction of typographical error as the strikethrough line fails to fully cross-out the number "14" in claim 33)

\*\*\* In claim 33, line 2, change "~~14-21, 23, or 25-31~~" to -- ~~14-21, 23, or 25-31~~ --

#### ***Allowable Subject Matter***

2. Claims 7-10 and 25-33 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

Applicant's amendment filed December 22, 2003 and convincing remarks have overcome the rejections of record. The references including Maruyama (6,034,894), Ahn (5,614,747), Ogura (5,780,341), etc., of record, alone or in combination, do not fairly anticipatively disclose each and every aspect of the claimed method for producing a nonvolatile semiconductor memory device, or fairly make a prima facie obvious case of the claimed method, in combination with other processing claimed limitations, the further inclusion of forming a third gates on a first insulator film disposed on the silicon substrate, wherein a plurality of third gates are formed in a stripe shape and are formed parallel to each other; forming second conduction type semiconductor regions, wherein the regions are formed on the well surface under one end of the third gates by tilted ion implantation using a plurality of stripe-shaped third gates as a mask; and

Art Unit: 2822

the step of forming a first pattern to act as floating first gates between the third gates is conducted after the step of forming the second conduction type semiconductor regions.

\*\*\* The obviousness-type double patenting rejection, in the last office action, of the claims as being unpatentable over the Patent No. 6,438,028 is withdrawn, since claims 11-13 and 34-39 were canceled. The obviousness-type double patenting rejection of the claims as being unpatentable over the claims of U.S. Application Serial No. 10/206,982 is also withdrawn, since U.S. Application Serial No. 10/206,982 is now issued as U.S. Patent No. 6,687,156 having only product claims 1-5 drawn to a semiconductor integrated circuit device.
